History

United Child Care Center has been in constant operation since its founding in 1969. On January 29, 1971, the center established a not-for-profit status.

Through the outstanding support of The United Way, Social Services Block Grant (Title XX), the State Food and Nutrition Program of Indiana, private contributions, and volunteers we are able to continue quality child care at an affordable rate for families of all income levels.

Present

United Child Care Center is a licensed child care center serving ages 3–6 years. The Center has a capacity for 30 children. We are also an accredited preschool program offering the community a well-balanced program with qualified staff.

The United Child Care Center, Inc. does not discriminate against race, color, sex, religion, or ethnic origin.

Program

United Child Care offers an extensive program for the preschool age child. Areas dealt with on a daily basis include:

- training in left to right progression
- pre-reading and pre-math readiness
- science and history projects
- lessons taught in a comprehensive manner for the young child

- large and small muscle development
- a very exciting music, exercise, and art curriculum.

The single most important feature of our program being the exposure to the socialization process, learning to relate well with other children, sharing, taking turns and the realization that, *"There is no one else exactly like me in the whole world, and that makes me very special."*

Our Center is designed to prepare the young child for his or her future experiences at school, not to propel his abilities far beyond that of his peers, although individualized teaching at various levels is constant. Children learn a great deal of valuable information through interaction with one another and imaginative play. The creativity of the young child often affords him a more exciting and beneficial experience than the most detailed lesson, planned by a qualified teacher. In this respect, children enrolled at our Center are allowed space to grow and experiment at their own pace.

Nutrition Program

The menus are well-balanced nutritious meals providing approximately 85% of the daily nutritional needs of young children.

Breakfast, lunch, morning and afternoon snacks are served to the children.
